## NEW OBERDAMÜLS 6-PERSON CHAIRLIFT

The good old 2-seater chairlift has served us well and is now to be replaced with a brand new 6-seater chairlift.

Here, getting seated is easy thanks to the conveyer and engageable system. A quick trip to the top station at a record speed of 6 m/s is guaranteed – and comfortable, due to the stylish upholstered seats that boast heating and bubble covers as a perfect shield against the weather. The trip up the mountain is safe for small children too, with footrest barriers that prevent them from falling out.

....keeping to the secure and marked routes and, when in doubt, keeping to the marked slope. Even if there are already marks in the snow leading through the forest: don't let the last person's mistake become your own.

A slope covered in fresh snow might offer a feast for the eyes, an adrenaline rush and pure temptation for every winter sports person. But for the mountain's other inhabitants, the very same slope is their home. Let's grant them the space they need and respect their territory!
